

## 3-way changeover ball valve DBA-D, stainless steel <br> 

DN 4-40 mm PN bis 500 bar

Series 02 - male thread on both sides for non-soldering compression fittings with cutting ring DIN 2353 - light-duty series
03 - male thread on both sides for non-soldering compression fittings with cutting ring DIN 2353 - heavy-duty series

Temperature range Standard: $-10^{\circ} \mathrm{C}$ to $+90^{\circ} \mathrm{C}$
On request: $-50^{\circ} \mathrm{C}$ to $+250^{\circ} \mathrm{C}$

Range of use Liquids: Liquids group 1 and 2 according to PED 2014/68/EU Article 13 Gases: Liquids group 1 and 2 according to PED 2014/68/EU Article 13 As a matter of principle, the resistance to the flow medium must be ensured.

Technical specification Up to DN 25, ball valve type DBI-C consists of a block body, from DN 32 it consists of a forged body with connector screwed in on both sides.
When using this ball valve, please note that, concerning the seal, this is a changeover ball valve. Pressure inlet must therefore be in the centre. Actuators can be attached by means of an extension kit. This retrofit requirement must be specified when placing the order (additional charge).
