# High-pressure ball valve HSKA-C, steel With male thread

DN 6 - 40 mm PN max. 500 bar

| Series                  | 02 – male thread on both sides for non-soldering compression fittings with cutting ring DIN 2353 – light-duty series  |
|-------------------------|---|
|                         | 03 – male thread on both sides for non-soldering compression fittings   |
|                         | with cutting ring DIN 2353 – heavy-duty series  |
|                         | 05 – male thread on both sides flat sealing for pipe thread<br>DIN EN ISO 228-1   |
|                         | 44 – male thread on both sides flat sealing NPT ANSI/ASME B 1.20.1  |
| Face-to-face lengths    | DIN 3202 – 5 series V1  |
| Temperature range       | Standard: -10°C to +90°C  |
|                         | On request: - 50°C to + 250°C   |
| Range of use            | Liquids: Liquids group 1 and 2 according to PED 2014/68/EU Article 13<br>Gases: Liquids group 1 and 2 according to PED 2014/68/EU Article 13<br>As a matter of principle, the resistance to the flow medium must<br>be ensured.   |
| Technical specification | The HSKA-C type ball valve consists of a forged body with connector screwed in on one or both sides. The stem is blowout-proof. Up to nominal width DN 25, the stem is fitted from the outside by means of a fitting. Simple replacement of the stem seal is ensured by the fitting used. A stem seal in accordance with the German Technical Instructions on Air Quality Control (TA Luft) is available as standard from nominal width DN 32 and can be used, on request, up to nominal width DN 25 for an additional charge. Actuators can be attached, from nominal width DN 32, by means of an extension kit. This retrofit requirement is available as standard. |
